EDUCATION

Chandigarh University, Punjab, India	07/2026
Bachelor of Engineering – Computer Science and Engineering	
Kendriya Vidyalaya No.1 Chandimandir Cantt, Haryana	06/2021
Class XII CBSE	
Kendriya Vidyalaya No.1 Chandimandir Cantt, Haryana	03/2019
Class X CBSE	

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java, C/C++, Bash
Web Technologies: Next.js, React, Tailwind CSS, HTML/CSS, JSON, WebSocket
Backend & Databases: Node.js, Express.js, SQL, PostgreSQL, MongoDB, RESTful APIs, Database Concepts
Tools: Git, GitHub, Linux, Docker, Postman, CI/CD, Agile Methodology, SDLC
Core: OOPS, Data Structures, Algorithms, System Design, Operating Systems, Testing, UI/UX Principles

PROFESSIONAL EXPERIENCE

FullStack Developer Intern — Dripvive Creatives	01/2025 – 04/2025
- Architected and deployed performant Next.js components and Node.js services for rapid delivery in agile sprints. - Optimized SQL queries and Tailwind UI layouts, reducing page load times by 40% for better student experiences. - Implemented secure authentication and dashboards for 2k+ users, boosting feature engagement by 25% via UI. - Streamlined CI/CD pipelines and frontend workflows, cutting deployment time by 30% for engineering efficiency.	
Under Secretary – Tech — ISTE Student Branch, Chandigarh University	04/2025 – Present
- Spearheaded technical development of scalable Next.js platforms and APIs for student-led organizational growth. - Directed system architecture ensuring 99.9% uptime and reducing API latency by 150ms for backend services. - Mentored 15+ peers on TypeScript, OOPS, and performance testing to establish superior UI/UX and code quality. - Guided cross-functional teams using agile practices to coordinate 10+ feature releases and technical delivery.	

PROJECTS

Collab and Code — AI Collaborative Code Editor	06/2025
<i>Next.js, Tailwind CSS, Firebase, Realtime DB, Gemini AI, WebSockets</i>	Live • Source
- Built collaborative environment enabling real-time sync with <100ms latency for multi-user editing and persistence. - Implemented production-ready access control and Tailwind CSS layouts ensuring reliable and responsive web infrastructure. - Leveraged Gemini AI for automated code assistance and error detection, improving developer-centric tool quality.	
Technicia — University Tech Fest Platform	03/2025
<i>Next.js, Tailwind CSS, MongoDB, NodeMailer, Three.js, Framer Motion</i>	Live • Source
- Orchestrated production-grade platform handling 5k+ registrations and 15k+ footfall with performant landing pages. - Developed scalable backend for 5k+ registrations, handling 50+ requests per second during peak traffic hours. - Architected interactive 3D UI using React Three Fiber and Framer Motion, delivering seamless cross-device experiences.	
JuryX — Decentralized Evaluation System	05/2025
<i>PostgreSQL, TypeScript, OOPS, System Design, Next.js, Docker</i>	Live • Source
- Designed secure backend systems applying TypeScript and OOPS principles for fault-tolerant data processing. - Deployed Dockerized services with monitoring, decreasing incident resolution time by 35% through logging. - Optimized PostgreSQL performance and query logic, speeding up data retrieval by 50% for dashboard analytics.	

ACHIEVEMENTS

- Regional Winner** – Hack Fest 2025 (SAP Labs): Recognized innovative software engineering and ownership.
- Open Source Contributor** – SWOC / WOC: Contributed to TypeScript and Next.js community projects.
- AIR 1274** – Naukri Young Turks National Exam (Coding, Data Science, AI Fundamentals)
- Top 5%** – NPTEL 2025: Cloud IoT Edge Machine Learning.
- Solved **500+** Data Structures & Algorithms problems (Knight on Leetcode)
